Achievements of the students (Department wise)

Physical Education Department

The recent achievement of Siddharth Balhara has rendered his Alma Mater proud. He represented India at the Asian Skateboarding Championship, China – Top 12 (Street) & Top 18 (Park). With precision and agility in every move, Siddharth Balhara is making India proud in skateboarding. From his first Bronze in 2019 to the Gold at the 62nd National Championship 2024 and multiple wins in 2025, the journey of our rising ‘Star on Wheels’ screams dedication and grit. In a short span from 2019-2025 he bagged 11 Golds, 4 Silvers and 7 Bronze medals while participating in 24 championships - 12 National and 2 International.

Participants: Students (Classes IV–VIII)
Focus: Awareness, confidence-building, and safe decision-making.
- 4) **14 July** - Activity: Child Safety Walk & Street Play (Neighbourhood Outreach)
Participants: Selected Students, Teachers
Focus: Community awareness on child safety.
- 5) **17 July** - Activity: Street Play on Child Safety (School Presentation)
Participants: Students (Classes IV–XII), Teachers
Focus: Sensitisation on personal safety and responsible behaviour.
- 6) **18 July** - Activity: Parent–Teacher Meeting on Child Safety
Participants: Parents, Teachers
Focus: Child safety at school and at home.
- 7) **23 July** - Activity: Essay Writing / Slogan Writing Activity
Organised by: English Department
Focus: Safe and unsafe places, cyber safety, emergency response.
- 8) **30 July** -
Activity: Inter-House Wall Magazine Competition on Child Safety
Participants: Students from All Houses
Focus: Creative expression of child safety awareness.
- 9) **31 July** - Activity: Valedictory Assembly Session

Speaker: School Counsellor

Participants: Students (Classes IV–XII), Teachers

Focus: Summary and reinforcement of month-long learnings.

10) Ek Bharat Shreshth Bharat year long activities being conducted by the school.

11) Bhartiya Bhasha Camp of Literary Activities conducted by DOE.

Workshops organized in the school for Teachers: -

- 1) DPPS, SJE in collaboration with The Mind Sync conducted the Teacher Felicitation Ceremony honouring the teachers for successfully completing the 8 hour 'Mental Health Education Teacher's Training'. The teachers are now certified Mental Health Educators. The occasion was graced by Sh. Deepak Kedia, IPS who is currently serving as an Inspector General at the National Security Guard(NSG). Other dignitaries included Dr. Rishabh Sharma, Medical Office Incharge at IHBAS, Mr. Manas Dubey, Founder The Mind Sync and Mr. Rohan Jadhav, Vice President, The Mind Sync. The Mind Sync is a pioneering mental health education organisation and the developer of India's first Mental Health Education Program for schools.

Accolades earned by the Principal:

- 1) Felicitation in Educators' Conclave 2026 – "Unlocking Possibilities", held on 16th and 17th April 2026 at the Karnavati University campus, Gandhinagar (Ahmedabad).
- 2) Interview of Ms. Ruby Malhotra, Principal, DPPS, SJE published in Times NIE dated 8th July, 2026.
- 3) Attended Times of India (NIE) Educator's Conclave on 31st July, 2026 as Panelist and an Eminent Speaker.
- 4) Attended ET Education Roundtable for an insightful exchange on "AI in Institutions" on 15th September, 2026 as a Panelist.
- 5) Selected as a Panelist at the **International Principals' Conclave 2026** for "Achieving Intercultural Harmony through Global Education and Virtual Collaboration" to be held on 2nd October, 2026.

A vision for tomorrow

Q1. How do you balance AI and digital learning with concerns about screen time, equity, and authentic learning?

Education is evolving rapidly, but leadership requires discernment more than speed. AI and digital tools offer valuable opportunities, yet technology must support learning, not replace thinking. In our school, digital learning is used with purpose and moderation. Equal importance is given to handwritten work, discussions, experiments, and project-based learning rooted in real-life experiences. I am concerned about students and even teachers becoming

Principal Speak

dependent on instant digital answers. We therefore create screen-light learning spaces where curiosity, effort, and human interaction remain central. AI is introduced as a tool for inquiry, never for copying.

Q2. Teacher burnout is a growing concern. What changes has your school made to better support and retain educators?

Teacher well-being is essential. Burnout rarely comes only from workload; it often stems from emotional fatigue and feeling unheard. I encourage a culture where teachers can speak openly and feel respected. Trust, protected planning time, and mutual respect are necessities, not incentives. When teachers feel valued, motivation, collaboration, and commitment grow naturally.

Q3. How has the emotional landscape

of students changed, and what is your school doing beyond simply having a counsellor?

Students today are more aware and expressive, yet many are also anxious and emotionally unsettled. Recognising this, our school has introduced the Mind Sync programme. Teachers are trained as mental health resource persons while receiving counselling support themselves. From Classes 1 to 10, we are introducing a dedicated mental health period, placing emotional well-being alongside physical health. This reflects our belief that emotionally supported teachers nurture emotionally resilient students.

Q4. With greater emphasis on the foundational years (ages 3-8), how is your school

rethinking early childhood education?

The foundational years shape lifelong learning. We are aligning our practices with the NEP by prioritising language development, play, movement, and discovery. While remaining an English-medium institution, we adopt a bilingual approach so children feel understood before they are instructed. Learning at this stage should be joyful. When teachers participate with genuine enthusiasm and engage at the child's level, learning becomes a shared experience rather than a one-way process.

Q5. How do you balance parental expectations for results with your vision of what education should truly achieve?

As a welfare school, we serve many police wards whose parents often have demanding responsibilities. Our teachers patiently help students build confidence, resilience, and discipline through experiential learning beyond textbooks. Meeting alumni who once struggled but now hold responsible positions, including in government, reminds us that holistic development creates lasting success. Academic discipline remains non-negotiable. Our goal is not to choose between results and purpose, but to achieve both, preparing children for examinations and for life.

Ruby Malhotra,
principal,
Delhi Police Public
School, SJE

6. Write up of Pranav Malhotra (Class IX) in Hindustan Times dated 31st July, 2026.

OPINIONS

Weighing the pros and cons of AI in students' lives today

Pranav Malhotra
Class 9, Delhi
Police Public
School, Safdar-
jung Enclave

In the wake of recent developments, we have experienced a new form of technology emerge called artificial intelligence (AI). Just a few years ago, students relied on books and articles to find answers.

But now students can get the same information instantly with AI.

AI has long been a subject of immense debate among scholars and teachers worldwide.

While many call it a revolutionary technology, others blame it for suppressing creativity and independent thinking.

AI and social media have made education more accessible through free online resources. It can explain complex concepts and help students learn at their own pace by generating practice material. Digital classrooms have opened countless doors to knowledge that was once difficult to access. Technology has truly made learning more flexible and inclusive. However, this technology also has its own unique challenges. Social media notifications, endless scrolling, and misinformation can distract students from their goals. Relying too heavily on artificial intelligence for projects and assignments may reduce creativity and critical thinking.

The solution is not to reject technology, but to use it wisely and cautiously. Students must manage their screen time and verify information from reliable sources. Students should use AI as a guide rather than a shortcut for learning, and schools should teach digital literacy as part of their curriculum to prepare students to think critically in a rapidly digitizing world.

Technology should support learning, not replace it. Technology is neither a hero nor a villain. It is a highly impactful tool whose outcome depends on the choices we make.

The challenge before us is not keeping up with technology, but learning to use it with balance, wisdom and purpose.

Warm regards,

Ruby Malhotra
Principal
DPPS/SJE
